

ROYALSTAT™ R63

CONDUCTIVE FIRE-RATED* RIGID ABS/PVC SHEET

PROCESSING:

ROYALSTAT™ R63 thermoplastic sheet can be processed on virtually all thermoforming equipment from high volume, multi-station rotary machines to hand-operated presses. It is readily hand-formed for prototyping. Temperature controlled aluminum molds are highly recommended, although epoxy and wood molds may be used for prototyping. Stock temperatures of approximately 340°F-380°F are necessary for proper forming. Caution: Stress-free forming is required to maintain conductive properties. Please contact Royalite for data relating to a specific application and equipment.

COLORS & TEXTURES:

ROYALSTAT™ R63 sheet is offered in black only with a multitude of textures ranging from smooth to deep-textured.

FINISHING:

With conventional plastic fabricating tools, it is possible to machine, saw, drill, rout and grind this rigid ROYALSTAT™ sheet. As long as proper procedures are followed, this material can be joined to other materials, or itself, by adhesive bonding, heat or ultrasonic welding and by mechanical fasteners such as screws, rivets and staples. Please contact Royalite for specific recommendations.

AVAILABILITY:

ROYALSTAT™ R63 rigid, conductive, fire-rated*, ABS/PVC sheet is available from our warehouse with a Level Haircell grain in a 54" x 96" blank size in gauges ranging from 0.047" to 0.250". Specific blank sizes can be cut to order for an extra charge. For a specific listing of warehouse offerings, please contact us or our nearest distributor. Warehouse materials can normally be shipped within 72 hours of receipt of the order.

Other grain textures, gauges and blank sizes are available subject to normal production scheduling. Roll stock is also available. Maximum width available is 57". Maximum gauge is 0.250". Minimum gauge is 0.030". Widths and gauges outside the standard are available with some restrictions.

SUMMARY OF PROPERTIES:

ROYALSTATTM R63 thermoplastic sheet is a conductive ABS/PVC product that is fire-rated* and has high tensile strength, excellent ductility and exceptional formability.

		AVERAGE	TEST
PHYSICAL PROPERTIES (units)		VALUES(1)	METHODS
Specific Gravity		1.22	ASTM D-792
Tensile Strength, machine direction	(psi)	4500	ASTM D-638
Flexural Strength	(psi)	7100	ASTM D-790
Flexural Modulus	(10 ⁵ psi)	2.8	ASTM D-790
Hardness	Rockwell Scale R	87	ASTM D-785
Impact Strength, Gardner Drop Dart	(in-lbs)	> 160	ASTM D-5420
Heat Deflection Temperature @ 264 psi	(°F)	165	ASTM D-648
Thermoforming Temperature Range	Low (°F) High (°F)	340 380	Machine
Mold Shrinkage	(in/in)	0.005-0.007	
Flammability Rating*: Motor Vehicle Standard Underwriters Lab		Passes Listed (2)	FMVSS 302 UL94 V-1
Surface Resistivity	(ohm/sq)	≤ 10 ⁵	ASTM D-257
Static Decay @ 15% Rh	(sec)	≤ 2.0	EIA-541
(4) At 0.40Ell			

(1) At 0.125"

(2) At 0.066" (1.68mm) and above

NOTE: The data listed herein reflect typical sheet properties. They are the latest available at the time of publication and are reliable to the best knowledge of Royalite. The properties are listed solely to give general guidance and are not to be construed as a warranty or representation for which Royalite assumes responsibility.

We cannot anticipate all conditions under which this information and our products, or the products of other manufacturers in combination with our products, may be used. We accept no responsibility for results obtained by the application of this information or the safety and suitability of our products, either alone or in combination with other products. Users are advised to make their own test to determine the safety and suitability of each such product or product combination for their own purposes. We sell the products without warranty. Buyers and users assume all responsibility and liability for loss or damage arising from the handling and use of our products, whether used alone or in combination with other products.
